THE EMBEDDED SOFTWARE MARKETING INTELLIGENCE PROGRAM:

2008 SERVICE YEAR

TRACK 1: OPERATING SYSTEMS USED IN EMBEDDED SYSTEMS

VOLUME 4: MULTI-CORE COMPONENTS AND TOOLS

JULY 2008
THE EMBEDDED SOFTWARE MARKETING INTELLIGENCE PROGRAM:

2008 SERVICE YEAR

TRACK 1: OPERATING SYSTEMS USED IN EMBEDDED SYSTEMS

– VOLUME 4: MULTI-CORE COMPONENTS AND TOOLS –

Study Team:

Chris Rommel
Matt Volckmann
Steve Balacco

Production:

Amy Weiss

July 2008
The entire contents of THE EMBEDDED SOFTWARE MARKETING INTELLIGENCE PROGRAM: 2008 SERVICE YEAR; TRACK 1: OPERATING SYSTEMS USED IN EMBEDDED SYSTEMS – VOLUME 4: MULTI-CORE COMPONENTS AND TOOLS are proprietary to VDC Research Group, Inc. (VDC), and may not be distributed in either original or reproduced form to anyone outside the client’s internal organization within five (5) years of the report date without prior written permission of VDC.

VDC has devoted its best efforts to obtain for and provide to its clients as accurate data as is possible. Nevertheless, we cannot be held responsible for incorrect information provided to us by vendors, users, or others that we interview. Nor can we be held responsible for forecasts of the future evolution of an industry, which, in retrospect, proves inaccurate. Our goal is to provide the best possible analysis of an industry, utilizing data obtained through a time-proven and rigorous research methodology, for our clients to employ in developing strategies to compete in an uncertain and ever-changing business environment.

TRADEMARK ACKNOWLEDGEMENT: Many names of companies, associations, technologies, products and product types, etc. mentioned in this report comprise Trademarks, either registered or non-registered, owned by various entities. These are too numerous to mention individually. VDC acknowledges that ownership of these Trademarks exist, and requests that readers acknowledge this as well.

THE EMBEDDED SOFTWARE MARKETING INTELLIGENCE PROGRAM:
2008 SERVICE YEAR; TRACK 1: OPERATING SYSTEMS USED IN EMBEDDED SYSTEMS
– VOLUME 4: MULTI-CORE COMPONENTS AND TOOLS –

I EXECUTIVE SUMMARY ........................................................................................................ 1
  MARKET OVERVIEW ........................................................................................................ 2
  STRATEGIC ISSUES, TRENDS, AND MARKET DRIVERS ............................................. 2
  MARKET ESTIMATES AND FORECASTS ......................................................................... 3
  COMPETITIVE LANDSCAPE ........................................................................................... 3
  KEY SUMMARIES AND OBSERVATIONS ....................................................................... 4

II SCOPE AND METHODOLOGY ...................................................................................... 5
  SCOPE ................................................................................................................................ 6
  METHODOLOGY ............................................................................................................... 7
  Definitions ......................................................................................................................... 7
  Industry Segmentation ....................................................................................................... 9
  Product Category Segmentation ..................................................................................... 10
  Regional Segmentation ..................................................................................................... 10

III MARKET OVERVIEW ................................................................................................ 11
  MARKET OVERVIEW ....................................................................................................... 12
  When Moore is Less .......................................................................................................... 12
  An Evolution, Not a Revolution ....................................................................................... 12

IV STRATEGIC ISSUES, DRIVERS, AND TRENDS .................................................. 14
  TRENDS ......................................................................................................................... 15
  Are We There Yet? A Growing Number of Developers using Multi-Core ................ 15
  More Developers Evaluating Hybrid Designs ................................................................ 16
  Multi-Core Driving Investment in Commercial Software Solutions ......................... 18
  From Tethered to Mobile – Multi-Core Use Growing .................................................. 20
  A Global Phenomenon .................................................................................................... 23
  Legacy Code Impacting Embedded Multi-Core Processing ......................................... 23
  Multi-Core Use Fueling Use of OS Virtualization Solutions ........................................ 25
  Standardization and Best Practices to Facilitate Multi-Core Adoption ....................... 26
  KEY MARKET DRIVERS .............................................................................................. 26
  KEY MARKET INHIBITORS .......................................................................................... 27

V MARKET ESTIMATES AND FORECASTS .............................................................. 28
  MARKET ESTIMATES – CURRENT AND FORECAST ..................................................... 29

VI COMPETITIVE ANALYSIS ...................................................................................... 34
  MARKET SHARE LEADERS AND POSITIONING ......................................................... 35
  Wind River Systems ....................................................................................................... 36
  Lauterbach ...................................................................................................................... 36
  ARM ............................................................................................................................... 37
  Green Hills Software ..................................................................................................... 37
  Symbian Limited ........................................................................................................... 38
LIST OF EXHIBITS
THE EMBEDDED SOFTWARE MARKETING INTELLIGENCE PROGRAM:
2008 SERVICE YEAR; TRACK 1: OPERATING SYSTEMS USED IN EMBEDDED SYSTEMS
– VOLUME 4: MULTI-CORE COMPONENTS AND TOOLS –

III MARKET OVERVIEW................................................................................................................. 11

III-1 Current and Expected Characterization of Processor Design (Percent of Respondents)......................................................................................................................... 13

IV STRATEGIC ISSUES, DRIVERS, AND TRENDS..................................................................... 14

IV-1 Importance of Factors in Selection of Embedded Operating System (Average of Respondents; 1 = Not at all Important, 5 = Very Important)......................................................... 16

IV-2 Importance of Factors in Selection of Software/system Development Tools (Average of Respondents; 1 = Not at all Important, 5 = Very Important)......................................................... 16

IV-3 Current and Expected Use of Multiprocessing Methodologies (Percent of Respondents)......................................................................................................................... 17

IV-4 Current and Expected Multi-core/processor Configuration (Percent of Respondents)......................................................................................................................... 18

IV-5 Total Cost of Development ($US) (Average of Respondents)......................................................... 19

IV-6 Percentage of the Total Development Cost Attributed to Software Development (Average of Respondents)..................................................................................................................... 19

IV-7 Percentage of the Total Software Development Cost Attributed to Commercial Software Licensing (Average of Respondents)................................................................. 19

IV-8 Multi-Core and Multi-Core and Multiprocessor Respondents, Segmented by Vertical Market (Percent of Respondents, N = 18)......................................................................... 21

IV-9 Survey Respondents by Vertical Market, Segmented by Current and Expected Processor Design (Percent of Respondents)................................................................................................. 21

IV-10 Survey Respondents by Vertical Market, Segmented by Current and Expected Multiprocessing Methodology (Percent of Respondents)......................................................................................... 22

IV-11 Survey Respondents by Vertical Market, Segmented by Current and Expected Multi-Core/Processor Configuration (Percent of Respondents)......................................................................................... 22

IV-12 Survey Respondents by Geographic Region, Segmented by Current and Expected Processor Design (Percent of Respondents)................................................................................................. 23

IV-13 Percent of Application Code Leveraged from Previous Designs by Multiprocessing Methodology (Average of Respondents)......................................................................................... 24

IV-14 Percent of Application Code Leveraged from Previous Designs by Industry (Average of Respondents)................................................................................................. 24

IV-15 Current and Expected Use of Operating System Virtualization on the Target Device/system (Percent of Respondents)................................................................................................. 25

IV-16 Primary Advantages Associated with Operating System Virtualization Technology (Percent of Respondents, N = 254)................................................................................................. 26
V  MARKET ESTIMATES AND FORECASTS ................................................................. 28
V-1  Worldwide Shipments of Multi-Core Components and Tools, and Related
     Services Through 2010 (Millions of Dollars) ...................................................... 30
V-2  Worldwide Shipments of Multi-Core Components and Tools, and Related
     Services, Segmented by Product Category (Percent of Dollars) ......................... 31
V-3  Worldwide Shipments of Multi-Core Components and Tools, and Related
     Services, Segmented by Product Category; 2007-2010 (Millions of Dollars)....... 31
V-4  Worldwide Shipments of Multi-Core Components and Tools, and Related
     Services, Segmented by Geographic Region (Percent of Dollars) ......................... 32
V-5  Worldwide Shipments of Multi-Core Components and Tools, and Related
     Services, Segmented by Geographic Region; 2007-2010 (Millions of
     Dollars) ................................................................................................................ 32
V-6  Worldwide Shipments of Multi-Core Components and Tools, and Related
     Services, Segmented by Vertical Market (Percent of Dollars) ...................... 33
V-7  Worldwide Shipments of Multi-Core Components and Tools, and Related
     Services, Segmented by Vertical Market; 2007-2010 (Millions of
     Dollars) .......... ................................................................................................. 33

VI  COMPETITIVE ANALYSIS .................................................................................. 34
VI-1  Worldwide Shipments of Multi-Core Components and Tools, and Related
     Services, Segmented by Leading Vendors (Percent of Dollars) ......................... 35
